

Oppose Efforts to Stop Large Truck Speed Limiter Rule

Speeding is deadly and is a primary factor in fatal crashes involving commercial trucks.

Trucks not using speed limiters were in **2x** as many high-speed collisions as those using speed limiters.

91% increase in truck crash deaths from 2012-2021 on roads with speed limits of 75mph or more compared to a 45 percent increase on all other roads.

Higher Speed Limits Diminish Safety

1/10

Speeding trucks involved in fatal collisions in 2021 were on roads with speed limits of 75mph or more

1/8

Large truck occupants died on roads with speed limits of 75mph in 2021

1/5

Truck drivers involved in a fatal crash had at least one prior speeding conviction in 2021

Setting speed limiters is a **simple solution** that uses **technology** already built into most large commercial trucks to make their operations **safer** and more **profitable!**

Oppose efforts to stop the Department of Transportation from finalizing a requirement for large trucks to use speed limiters.
